

# Equipment Management Systems

## Safe Equipment Management Systems

An innovative range of checklists and tagging systems for workplace equipment. Allows competent inspectors to carry out regular checks and clearly communicate the findings to all employees.

Good to Go Safety offers a simple, effective and affordable solution to equipment safety. It is flexible to meet your needs; buy as individual components or in kit format dependent on the frequency of your inspections.

### Can help companies to:

- Comply with legislation and industry best practice
- Prevent accidents
- Educate staff and improve morale
- Improve business performance
- Reduce operating costs
- Provide an indexed audit trail
- Quarantine faulty equipment
- Maximise safety

Tag it

Check it

Record it

Secure it

You're Good to Go

### Uses:

### Status Tag:

- Tough, weather resistant, UV stable, highly visible polypropylene
- Channelled base allows the tag to sit flush to poles – easily secured with cables, screws or adhesive
- Warning label is clearly displayed if the checklist insert is missing
- Allows tamper evident seal to be fitted

Code	Price
240115000	£7.30

### Check Books:

- Each check book includes 25 individual inspections with unique sequential numbering. A carbon copy is automatically retained upon completion of checklist. Guidance notes provide advice on how to check the equipment

### Weekly Inspection Kits:

- Provides everything you need to carry out an entire year of weekly inspections
- Contents:
- 1x Status tag
  - 100 x Tamper evident seals
  - 2 x Check books (50 inspections)
  - 1 x Check book wallet and pen

### Daily Inspection Kits: Tamper Evident Seals:

- Provides everything you need to carry out an entire year of daily inspections (based on a 5 day working week)
- Contents:
- 2x Status tags
  - 300 x Tamper evident seals, 11 x Check books (275 inspections), 1 x Check book wallet and pen

- High visibility red polypropylene
- Arrow head is carefully inserted into the tag to prevent it being opened. The seal must be snapped free to open the tag
- If the seal is missing then a new checklist should be completed and a new seal inserted to validate the inspection
- Supplied in a box of 100
